

Technical WorkGroup Meeting

Air Quality Study

September 11, 2013

Prepared by HMMH

15.9 Air Quality Study Presentation

Overview

2

- *Air quality study status*
- *Variances*
- *Next steps*

15.9 Air Quality Study Status

- *Reviewed existing information*
- *Evaluating existing conditions against state/national air quality standards*
- *Reviewing/summarizing ADEC air quality monitoring reports*
- *Reviewing/summarizing supplemental NPS air quality monitoring data*
- *Evaluating/documenting attainment status*

15.9 Air Quality Study Variances

- *None*

15.9 Air Quality Study Next Steps

- *Summarize applicable ADEC/EPA regulations*
- *Identify potential equipment types associated with project construction/operation*
- *Qualitatively assess short-term and long-term emissions potential*
- *Summarize baseline fossil fuel emissions associated with regional power generation*
- *Analyze and compare potential emissions With and Without Project*
- *Identify Best Management Practices to reduce air emissions from Project construction and operation*
