**PART B: SUPPLEMENTAL INFORMATION (AND ERRATA) TO PART A  
(FEBRUARY 3, 2014 DRAFT INITIAL STUDY REPORT)**

<b>Part A Reference</b>	<b>Description</b>
Passim	As explained in the ISR Overview and depicted in Figure 1, following release of the draft ISR in February 2014, AEA added a new north-south transmission and access corridor alignment from the dam site to the Denali Highway. This new alignment is referred to as the Denali East Option. For clarity, the north-south alignment studied to date (and historically referred to as the Denali Corridor) is now referred to as the Denali West Option. Hence, all references in Part A to the “Denali Corridor” are referencing the newly designated Denali West Option.
